

## CONVERTING AZIMUTHS - GRID TO MAGNETIC/MAGNETIC TO GRID

STEP	ACTION
1	<p><b>GRID TO MAGNETIC:</b> (map to compass)                      for easterly G-M angle                      subtract G-M angle from                      grid azimuth; for westerly                      G-M angle add G-M angle to                      grid azimuth</p> 
2	<p><b>MAGNETIC TO GRID:</b> (compass to map)                      for easterly G-M angle                      add G-M angle to compass                      azimuth                      for westerly G-M angle                      subtract G-M angle from                      compass azimuth</p> 

**Note:** On G-M angle diagram, if conversion direction is to the Left, ADD; if conversion is to the Right, SUBTRACT  
 LARS - left add right subtract
