

RECON ZONE	
ITEM	METHOD
1	Use fan method
	PL selects series of ORPs through zone
	Select recon rtes to and from ORP - overlapping rtes form fan shaped pattern around ORP. Recon elements recon adjacent rtes
	After recon complete, move to next ORP and repeat
2	Use converging routes method
	Leader select ORP. Recon rtes through zone, and then a link up point
	Each element recons own route; entire unit links up at end

RECON ZONE	
ITEM	METHOD
3	Use successive sectors method
	Leader selects ORP, a series of recon rtes, and link up points
	Each link up point becomes ORP for next phase
Notes:
